

Building a better Romania

Halcrow – company profile

Halcrow specialises in planning, design and management services for infrastructure development worldwide.

Halcrow in Romania

Our work in Romania is delivered by Romanian specialists who have experience of projects around the world.

We are known for our multi-disciplinary capability, combining local knowledge with international best practice. We bring years of experience in procuring European Union funding, as well as trusted technical expertise.

About us

Halcrow has worked on projects in Romania since 1992 and we established our first permanent office here in 2001. Today, our Romanian operation employs 100 people. Our permanent offices are in Bucharest and Timisoara.

Halcrow is an independent company owned by the Halcrow Trust and an increasing number of staff shareholders. Annual turnover in 2008 was over £450 million and we have around 8,000 people in over 90 offices around the world.

Our ethos

Halcrow is a values-based organisation delivering exceptional experiences.

Our values:

- bringing imagination to all we do
- delivering on our commitments
- advancing our skills and experience
- enjoying what we do

Our conduct:

- act with integrity
- be open and honest
- respect the dignity of others
- share knowledge freely

The purpose that underpins everything we do is 'sustaining and improving the quality of people's lives'.

Working with Halcrow

Our 'one Halcrow' approach means that whatever the challenge there is a Halcrow person somewhere in the world who has the solution. The diversity of our people enables even large, complex projects to be resourced from a single point.

We energetically pursue project savings – we've achieved demonstrable savings for many clients. Our ability to develop long-term relationships means we provide stable, consistently high standards of service delivery – coupled with this is a flexibility to provide one-off incisive action where required.

Our areas of expertise

We are specialists in the development and design of infrastructure projects, helping our clients to develop their ideas, source funding and implement projects.

Our work covers:

Water and power

- Design, site supervision and technical assistance for water treatment plants and waste water treatment plants
- Design, site supervision and technical assistance and hydraulic modelling for water and waste water systems
- Design, site supervision and technical assistance for hydrotechnical works
- Placing dams under safety conditions
- Flood risk management
- Feasibility and market research for energy projects, including renewable energy
- Maintenance and operation management for industry fixed assets
- Design and technical assistance for waste abandonment remediation plants and landfills for non-hazardous waste

Transportation

- Design for highways, roads, bridges, trams, airports, railways, ports
- Feasibility studies, tender designs and detailed designs
- Master planning
- Tender documents
- Technical and financial assistance, business plans
- Financing applications for various funds
- Supervision of works
- Project management

Environmental protection

- Design and management for waste infrastructure

- Environmental impact assessments
- Environmental due diligence audits
- Environmental balances for operational and closure permitting
- Investigation and solution for remediation of contaminated sites
- Technical documentation for water management permitting
- Technical assistance for finding feasible solutions to environmental problems

Urban and territorial planning and development

- Strategic sectoral and integrated territorial planning
- Spatial planning at inter-communal, county and regional levels
- Land management
- Urban management: integrated planning, regeneration, local development strategies and policies, public-private-community partnerships, marketing, institutional and community development
- Complex projects for local, regional, cross-border, metropolitan and rural development.

Our work

Halcrow's work in Romania has gained the trust and recognition of many local, regional and central authorities.

We have worked on projects funded by international financial institutions – World Bank, European Bank for Reconstruction and Development, International Bank for Reconstruction and Development, European Investment Bank – as well as the European Union, central and local Romanian authorities and private companies, and private-public partnerships.

Certificates

We have ISO 9001:2000, ISO 14001:2004 and ISO 18001 certification from the Romanian Society for Quality Assurance.

Our certificate from the Ministry of Environment and Water Management enables us to perform environmental impact assessments in many areas:

- agriculture
- petrol, gas and coal extraction
- metal processing and production
- chemical and petrochemical production and storage
- waste management
- infrastructure projects, eg roads
- water and wastewater management systems
- dams and reservoirs

Our certificate from the Ministry of Environment and Sustainable Development allows us to deliver the water management documents needed for the water permitting procedure.

We also have an attesting certificate from the Romanian Roads and Bridges Professional Association for consultancy and design.
