

Intelligent transport systems from Halcrow

Intelligent transport systems

Transportation

Consulting

We're able to bring together the right people to meet the needs of each project. As a result we've built a solid reputation with our clients, based on technical excellence, innovation, trust and delivery on time and within budget.

Our intelligent transport systems project portfolio includes strategy, design, procurement, delivery, operation and maintenance for:

- Managed Motorways and inter-urban control systems
- UTM systems for city control and management
- UTC/SCOOT/MOVA, traffic signal design and implementation
- ITS/micro simulation modelling for decision making
- road pricing, tolling systems and congestion charging projects
- real time passenger information systems
- SMART card ticketing
- fibre optic, wireless and digital communications

Our clients include the Highways Agency, Greater Manchester Passenger Transport Executive, Transport for London and many UK local authorities. Internationally, we've worked for RTA Dubai, Intertoll India and LLM Malaysia. We've acted as adviser for due diligence on numerous toll roads.

To find out how we can make a difference to your project, please contact:
